# Mask Production 2020

May be worn alone or over an N95 for isolation precautions to extend N95 use when appropriate during a severe shortage of available PPE. Intended for reuse after laundering. If N95 is visibly soiled, it must be discarded.

#### **Materials**

OR linens or other breathable water repellant fabric Pins

1/4" or 3/8" wide Elastic – white or black

Thimbles

Fabric Scissors

Heavy paper for patterns: 9" x 15" & attached mask pattern Cardboard – optional (\*\*tip: use a 9.5" piece of cardboard to loop around 10-15 times to cut all at once to produce 20-30, 9.5" pieces)

Sewing Machine

Thread

## PREP – Estimated time 3 minutes per unit Station 1: Cutting

Cut a rectangular 9" x 15" base paper pattern Fold fabric in 4 layers Lay 9" x 15" base pattern on top of 4-layer fabric Cut around the base pattern

# **Station 2: Pinning**

Take 2 cut sheets and fold in half to make 4 layers Cut mask pattern per attached sample (8.19 x 5.4") Pin mask pattern to cut 4-layer fabric using 4 pins around the outside

#### **Station 3: Cutting**

Cut the fabric for the mask pattern

# **Station 4: Finishing**

Remove pins and paper pattern from cut fabric

Separate 4 fabric pieces into 2 sections of 2 layers of fabric each

Pin 2 piece sections around curved edge vertically, every 2"

#### **Station 5: Elastic**

Cut elastic into (2) 9.5" sections.

Insert (1) elastic into each 2-piece pinned section through the flatter open edge (opposite from the edge that is pinned)

Check to be sure elastic is not twisted inside the section. Once elastic strip is inserted into the opening and placed flat in a U shape, center the new elastic ear loop and pin down each end of the elastic strip 3" apart - EVEN with the edge of the fabric (\*\*tip: create a 3" line on your table as a guide\*\*)

Use your completed 2-piece section as a guide for the other section to keep ear loops even

Place a single pin through middle of the 2 sections to make one unit, ready for sewing

# **Station 6: Quality Control**

Examine product and correct any defects before advancing to sewing

## **Station 7: Distribution**

Count and log mask units before issuing for sewing distribution. Record the name of the person picking up inventory. Ensure timely turnaround time of assigned masks, and do not over allocate to a single sewing resource.

## SEWING – Estimated time 7 minutes per unit

Unpin the 2 sections pinned together

Place one 2 piece section on the machine and prepare to sew the edge with the elastic ends

Place machine on a zigzag stitch and sew along the entire edge

Line up second 2-piece section, place on the machine and sew the edge with elastic ends

Remove from the machine and take out the pins Turn both sections inside out

For each section, sew a straight stitch on the same edge for extra stability for the elastic, ensuring the elastic is caught in the stitch

Place one section directly on top of the other section, line up directly on top of the other and prepare for sewing

Using a 5/8" seam for a small size N95 and a 1/2" seam for a regular N95, zigzag stitch down the section that will be over the nose part of the mask, making sure all pieces are getting caught in the stitch

Backstitch to finish and cut loose threads

Open completed mask

Trim up any frays

Examine product and correct any defects
